Service: Medication Management/RN Services/Med Set-up

Service Definition: Direct assistance to clients in managing use of prescription and OTC (over the counter) medication and nutritional supplements.

Services include:

- Face-to-face review of client's prescription and OTC medications
- Regular set-up of medications
- Monitoring compliance with medication
- Cueing
- Communicating with physicians, family and/or primary caregivers regarding compliance with medication
- Educate and training family and caregivers
- Client assessment with vital signs
- Create and update client medication list
- Re-order medications

Service limitations:

- The visiting RN or LPN may choose to stop service due to inappropriate behavior.
- If the visiting RN or LPN suspect misuse of medications, they will notify your physician.
- If medications come up missing, it will be reported to the physician and the authorities.
- The visiting RN or LPN do not pick up or transport narcotic medications.

The RN or LPN also observe, report and record any change in client's condition and home environment. All changes are to be reported to the Director of Client Services or Executive Director.

*It is the expectation of the COA that the client is up and ready at the time scheduled by the COA provider. The RN or LPN is allotted only one hour per visit to complete this service.

*The COA does not guarantee a specific day or time for services to be completed. The RN or LPN will accommodate schedule requests as best as possible.

*If a client is consistently not home for their scheduled visit, nor do they notify the COA to cancel, the COA may discontinue services.
